

CuraPhyll™

A Superhydrophobic coating

Nanophyll Textile Solution

How does it work?

- ✓ NanoPhyll incorporates nano-structures to create an anti-wetting solution that can be easily applied to any textile.
- ✓ Results in a stain resistant, self cleaning coating.
- ✓ The solution chemically bonds to fabric to create a durable, long lasting effect.
- ✓ The solution is water-based and ecofriendly, making it ideal for a wide range of applications.
- ✓ The product can easily be incorporated into any manufacturing line.

CuraPhyll™

A Superhydrophobic coating

A unique, long-term, high-performance nanocoating that is designed to protect Commercial Transport and Industrial sector textiles.

KEY BENEFITS

- ✓ The highly hydrophobic surface repels water and resists staining.
- ✓ The stain resistance effect lasts multiple washing cycles.
- ✓ This unique quality lengthens the period a product can be used.
